

The Brady Learning Center is now accepting enrollment for spring 2009 classes in Greensboro, Raleigh and Wilmington locations. Training materials and lunch will be provided. Select your classes from the course listing below and call Lea Saunders at (800) 849-1915 ext. 6512 to reserve your seat today!

SPRING 2009 Training Class Schedule

Basic AC Clinic (with 410A Refrigerant Training)

March 18-19, 2009 9am- 4pm

Raleigh Location: 401 Kitty Hawk Dr., Morrisville, NC 27560

This course includes training and updates on the 410A Refrigerant. Learn the basics of air conditioning as applied to the refrigeration cycle; the theory of heat transfer; refrigeration system components; refrigeration system accessories; refrigeration system piping; the differences in the rotary; absorption; and centrifugal chillers; fans; VAV systems and controls. Cost: \$500.00 per attendee.

Tracer Summit Workshop

March 25-26, 2009 9am- 4pm

Greensboro Location: 1915 North Church Street, Greensboro, NC 27405

Learn to monitor and control building mechanical systems, respond to alarm conditions, generate reports and change schedules, system control parameters, and graphics. Topics include software operations, setup functions, reports, application programs, and graphics. Cost: \$600.00 per attendee.

CenTraVac Owner Operator Workshop

April 1-2, 2009 9am- 4pm

Raleigh Location: 401 Kitty Hawk Dr., Morrisville, NC 27560

April 8-9, 2009 9am- 4pm

Wilmington Location: 6736 Netherlands Dr. Wilmington, NC 28405

This workshop breaks the chiller into sections, with complete understanding of each component. Attendees will also gain an important insight into ASHRAE standards and the environmental issues used by decision-makers in focusing on replacement or retrofit concerns. Cost: \$600.00 per attendee.

Rotary Chiller Workshop

April 16, 2009 9am- 4pm

Raleigh Location: 401 Kitty Hawk Dr., Morrisville, NC 27560

This course provides an in-depth understanding of the controls, maintenance and diagnosis of rotary chillers. This course provides insights into compressor design, unit operation, unit installation, start-up requirements, unit performance and service diagnosis. Specific service steps are covered for refrigerant handling and component service. Cost: \$500.00 per attendee.

***We also offer personalized on-site training.
