Brady Associates Establish Scholarship Fund to Honor Co-worker
Guilford Technical Community College Students Benefit From Ted Woodard Legacy

GREENSBORO N.C. (February 2, 2012) — Associates at Brady (www.brady-services.com), a company that provides energy-efficient HVAC systems and comprehensive building solutions for commercial and industrial facilities across North Carolina, established a memorial scholarship fund at Guilford Technical Community College to honor Theodore (Ted) J. Woodard. The late Woodard was a senior technical advisor for Brady and worked with the company for more than 42 years. Brady associates committed to donating \$2,000 and the company presented a matching \$2,000 check to the college in late January.

“Ted helped build Brady into the statewide organization it is today,” said Don Brady, Chairman and founder of Brady. “He was both a mentor and friend to all Brady associates.”

Associates of Brady believed the memorial fund would be a fitting tribute to a man who was passionate about his trade, as well as building sustainable communities through education. Establishment of the fund further advanced the long-standing partnership between Brady and GTCC. Brady has provided the institution and its students with equipment, instructors and scholarship funding for decades. In return, GTCC has provided the company with a pool of exceptionally trained employment candidates.

About Brady:

Celebrating its 50th year, Brady is headquartered in Greensboro, North Carolina with offices in Raleigh, Fayetteville, Wilmington and Charlotte. Founded in 1962 by Chairman Don Brady, the company remains a family owned enterprise, today employing 327 associates. The company works with building owners, facility managers, developers, architects, engineers and contractors providing sustainable, comprehensive building solutions for commercial and industrial facilities. Brady provides customers with a diverse range of solutions including building automation, energy conservation, green design, performance contracts, mechanical systems, parts and supplies, as well as responsible technical support.
